# VED PRAJAPATI

B.Tech CSE (Data Science) Student | Aspiring Software Developer

Vadodara, Gujarat • +91 8128309038 • LinkedIn • GitHub • LeetCode • Portfolio

## SUMMARY

First-year B.Tech student in Computer Science and Engineering (Data Science) at VIT Vellore, interested in full-stack web development, data analysis, and machine learning. Builds web applications and explores datasets through independent projects, with a focus on practical problem-solving and continuous learning.

## EDUCATION

**Vellore Institute of Technology (VIT), Vellore** — B.Tech, CSE (Data Science) **2026–2030**

Treehouse High School, Atladra, Vadodara — Class XII: **86%**

Don Bosco High School, Makarpura, Vadodara — Class X: **90%**

**JEE Main 2026:** 96.9 percentile

## PROJECTS

### WatchiT — Real-Time Watch-Party Platform

*Next.js, Node.js, Socket.IO, MongoDB, YouTube API*

- Built a watch-party application where users create or join viewing rooms with party codes.
- Implemented synchronized playback controls, including play, pause, seeking, and playback speed.
- Added real-time chat and emoji reactions for participant interaction.

*Live demo • GitHub: profile*

### Ecom Easy — Full-Stack E-Commerce Application

*Next.js, Node.js, MongoDB*

- Developed an e-commerce application covering product browsing, cart interactions, and the shopping workflow.
- Worked on buyer data modelling, backend integration, and connecting frontend components with application data.

*Live demo • GitHub: profile*

### Spotify Songs Analysis

*Python, Pandas, Matplotlib, Basic Linear Regression*

- Explored song attributes and popularity using data cleaning, exploratory analysis, and visualizations.
- Investigated relationships between track features and popularity, and experimented with basic linear regression.

### Compost Recommendation — Machine Learning Project (Ongoing)

*Python, Pandas, PyTorch*

- Prepared a structured dataset for a compost recommendation and degradation-prediction project.
- Trained and evaluated a neural-network model on a small dataset of approximately 200 records.

### TextUtils — React Text Utility Application

*React.js, JavaScript, HTML, CSS*

- Built text utilities for case conversion, whitespace removal, and copying text to the clipboard.

*GitHub profile*

## TECHNICAL SKILLS

**Programming:** Python, JavaScript, Java (Basic) | **Web:** HTML, CSS, React.js, Next.js, Node.js, Bootstrap, Tailwind CSS
**Data & ML:** Pandas, Matplotlib, Basic Linear Regression, PyTorch (project experience) | **Databases & Tools:** MongoDB, Git, GitHub, VS Code, Jupyter Notebook
**Design:** Figma, Canva

## STRENGTHS & INTERESTS

Problem-solving, analytical thinking, creativity, self-learning, and adaptability. **Interests:** Full-stack development, data science, and machine learning.
